

IMS POLICY STATEMENT

Energoprojekt Industrija JPC (hereinafter referred to as EPI) is determined to continually improve its business activities and the quality of its deliverables so as to ensure that its clients from Serbia and abroad keep ranking it among the top world companies dealing with design, consultancy and engineering services related to industrial plants and facilities. In addition, EPI provides services in the field of graphic and multimedia design. In order to achieve the high quality standards it pursues, EPI has established and has been improving its own Integrated Management System (IMS), covering quality management (in compliance with ISO 9001:2015), environmental management (in compliance with ISO 14001:2015), occupational health and safety management (in compliance with ISO 45001:2018) and energy management (in compliance with ISO 50001:2018). With its Integrated Management System, EPI has strived to meet the requirements, needs and expectations of both its product and service users and the entire Energoprojekt business system with its employees, owners and vendors, as well as the requirements, needs and expectations of the local community and the state, in the most comprehensive, effective, efficient and reliable manner.

EPI conforms all of its business activities to the applicable legal requirements in the fields of environmental protection, occupational health and safety, energy efficiency and energy usage and consumption, establishes environmental protection, occupational health and safety and energy efficiency programmes and engages in their consistent implementation, with the participation and consultation of workers. In its design solutions, plant, equipment and material specifications and design implementation methods, EPI uses the technical and technological solutions that prevent or minimise environmental pollution, i.e. improve human health and safety and industrial plant and equipment safety, and promotes energy efficient products and services. EPI identifies, analyses and evaluates risks related to environmental protection, occupational health and safety, industrial plant and equipment safety, energy efficiency and energy usage and consumption in accordance with the established criteria and assists its clients in the process of conforming their business activities to the relevant legislation in these areas.

EPI's top management team constantly organise, monitor, review and direct the activities of all EPI's organisational parts, departments and employees to ensure that the IMS policy is fully applied to every individual task. Therefore, the top management team are to ensure that all employees are fully acquainted with the adopted IMS policy, fully understand their duties and responsibilities related to the implementation of this policy in their daily activities and have access to all required resources and information, which will give them maximum motivation to constantly accomplish the goals of this policy.

The IMS policy adopted by EPI shall be continually monitored and reviewed by the top management team, whose duty is to continuously improve the IMS policy, promptly adapting it to all changes in the business and social environment, and efficiently implement the improved and adapted policy via the Integrated Management System.
